Now he produces many genres, plays many instruments, and operates a recording studio built in his basement. On top of that, he is in two metal bands and plays a unique instrument called a "Super Bass Double Keytar".

## CONTENT IN DETAIL

The sounds are divided into 2 categories in this pack

Bits - Sequences full of pitch bends, squelches and growls. Perfect for chopping up and piecing together to form new sequences. The bits have been provided at both 140 bpm and 174 bpm but will easily fit within other tempos as well.

Sustains - single note sustain samples great for loading into samplers or adding addition filter LFOs or envelopes. Both of these categories provide excellent flexibility for making the sounds your own. All samples are labelled with the correct key for efficiency.

As a bonus both FLP files (for use with FL Studio) of the audio demo have been included as well as Kontakt patches of the sustain samples.
