

Thank you for checking out my patterns for the TB-03! There's a lot of them and not all of them will be to everyone's taste, but it's my hope that everyone will find a few that they love.

Installing these is simple but I need to stress it will overwrite the contents of your TB-03 entirely, so make sure you back up your "BACKUP" folder!

All the instructions are at the end of the TB-03 manual, but to summarize:

1. Turn off the TB-03
2. Connect the USB cable
3. Holding down the RUN/STOP button, switch on your TB-03. Your computer will now show it as a mounted drive.
4. In this drive you'll see only one folder "BACKUP" (These are your presets, make a copy of these somewhere if you want to save them)
5. To install the AZS patterns, Unzip the the "BACKUP" folder, and drop the unzipped folder onto your mounted TB-03 drive, to overwrite the existing one.
6. Before you unmount the drive, press "Write/next"
7. Switch the TB-03 off and on again
8. Enjoy

If you want patches for your other synths check out my presets/soundbanks
