

CFA-Sound is operated by the german sounddesigner Martin Breuhahn, who worked already in the past for several other well-known soundlabels like Vengeance Sound and Sounds of Revolution under the pseudonym Cyforce. In spring 2008 he launched his own soundlabel CFA-Sound, which opened the doors for estabilishing his very own sound and style. While first taking care of all kinds of modern dance music by delivering soundsets for various synthesizers and plugins, he continuously expanded his concept to sample collections and self-programmed plugins – sticking to his slogan “discover the sound of tomorrow”: by being just the special bit different from “bread & butter” sound design. Next to the own products, CFA-Sound is active in sounddesign for well-known companies like Camel Audio and Motu.
