

Notes:

Thank you for choosing Ainy Zahev Sounds! I hope you get a lot of inspiration from using Halcyon. Each preset has macro controls already assigned and all except the FX category have **ModWheel** assignments.

Please explore the different variations of the sounds using these controls but keep in mind that the **pads** *especially* gain from using the **Modwheel** as it usually introduces pitch modulation, making the pads sound more organic and lively.

Installation:

Place the folder "AZS Halcyon" into the presets folder of Serum.
