Transitions Vol.3

Thank you for purchasing Transitions Vol.3 for Diva. This PDF contains the installation guide and patch list. With this bank, I have sought to provide a broad range of useful and interesting sounds, including cinematic pads and strings, analog modular style effects, rich basses and arpeggios and of course lots of dance music friendly sounds. I sincerely hope this sound bank proves useful to you in your musical endeavors!

Sami @ Aiyin Zahev Sounds

Installation:

Simply place the Transitions Vol.2 folder into the presets folder of U-he Diva. If you are not sure where that is you can right click on a preset in Diva's browser window and click "Open in Explorer" or on Mac "Open in Finder". This will take you to the location where the presets are saved.

Remember to right click on the presets folders tab in Diva itself and click refresh. If you are still having difficulties consult the Diva Manual for more information.

Patch List:

AM - Abandoned	BA - Tempest	PD - Airwave
