DISCOVER THE SOUND OF TOMORROW

CFA-Sound is a Germany-based sound design label always being true to its slogan „Discover the sound of tomorrow“. Nearly a decade of experience - Plenty of cooperations with sound labels such as Vengeance Sound, Sounds of Revolution and Loopmasters - Custom sound design for software DAWs & synthesizers (e.g. MOTU, Camel Audio) - Cooperations with the D16 & Sounds of Revolution experts on the PunchBox Bassdrum Synthesizer.

Having gained quite an audience under the pseudonym ‚Cyforce‘, Martin Breuhahn set sails to establishing his very own sound and style with the launch of CFA-Sound as an independent sound label in 2008. Aiming to take care of all kinds of modern dance music by delivering soundsets for various synthesizers and plugins, he continuously expanded his concept and portfolio to sample collections and plugins - always „Discovering the sound of tomorrow“: up-to-date and futuristic sounds, spiced up with the typical CFA-Sound touch, fitting the needs of electronic music producers and being just the special bit different from „bread & butter“ sound design.

In 2011, CFA-Sound teamed up with Sounds of Revolution to launch their corporate soundlabel and distribution Resonance Sound.
