

AIYN ZAHEV SOUNDS  
**ORGANISM**  
FOR U-HE HIVE

With the 1.2 update, this streamlined synth gets a huge expansion with wavetables. The inclusion of such a classic digital technology enables HIVE to reach back into time and connect us to the awesome wavetable sounds of the 80's and 90s. With it's filters, modulation and unison it enables us bring those sounds into a modern context.

Organism gives you 101 new presets, with a heavy emphasis on the ambient and luscious sound of unison wavetables. In fact the pads alone make up 40% of the soundbank.

All sounds have been carefully tweaked to sound good in a full mix context, and there's careful FX and modwheel assignments throughout. Take a listen to the demo and hear for yourself!

Sami Rabia began programming synthesizers over a decade ago, in 2012 he launched his first commercial sound banks under the moniker Aiyin Zahev starting with the release of Serenity for Ultra Analog. It was well received by professionals and enthusiasts alike, and he went on to produce packs for some other popular synths, including DUNE and Sylenth.

Not long after this he began working with developers such as Tone2 and Xils-Lab, and in August 2012 he teamed up with Resonance-Sound.

Sami spends hours tweaking patches, his goals have always been simple: beautiful sounds. Sometimes that means beefy basses, sometimes it means lush pads and serene plucks, sometimes it means complex evolving ambient patches, but he has always looked for those special “uplifting moments” sounds in synths.
