

**RESONANCE SOUND
ULTIMATE FUTURE BASS
FOR SERUM VOL.3**

We are happy to present you the third pack in our series of Ultimate Future Bass Presets for the best-selling synthesizer Serum. The genre is far away from dying out and new styles and subgenres constantly evolve out of it. It is our goal to cover all different styles of Future Bass and to deliver complex but yet radio-ready sounds. Some of our favorite artists in this scene include Illenium, Flume, Odesza, Martin Garrix, NGHTMRE, The Chainsmokers, San Holo, Marshmello and many more. We have listened to hundreds of successful tracks to recreate the style and capture the sound of the pros.

This pack comes with 64 Serum patches split into Arps, Bass, Bells, Brass, FX, Leads, Pads, Plucks, Synths and Keys. As always, maximum flexibility and ease is given by full macro-assignments throughout every single preset. This makes it even easier for you to adjust the sounds to your needs and explore the complex layers and timbres the individual sounds come with.

While the main focus of this series is to bring you shining leads, lush pads, enormous chords and brilliant plucks right to your fingertips, the sounds were also used in Trap & Hip-Hop recordings, R&B beats, Melodic Dubstep, Chillstep and even cinematic trailers.

For the ultimate starting point, we included 10 bonus midi files to give you instant inspiration. These melodies come with its root note labelled in their titles so you can throw them into your existing tracks or get inspired by starting from scratch.

With this pack you have no limits!

Please Note: This product contains Xfer Serum presets only. The drums used are for demonstration purposes only. You will need the latest version of Serum (minimum v1.286) to use these patches.
