

**SYNTHMORPH
REPRO1 ELECTRON**

The Repr01 Electron delivers an unparalleled experience by maximising the potential of u-he Repr01. The package includes 132 detailed and tagged presets, but the Synthmorph sequences are the heart of the matter.

All presets use pre-mapped controllers (modulation wheels, velocity and aftertouch), so you can use the instant modulation options expressively right away in your own DAW application.

And the magic is further enhanced by the use of Synthmorph sequences and layers!

As Repr01 itself has a simpler structure, you can fiddle with fewer synth parameters in the Synthmorph sequences (usually between 11-16), compared to other synths. Still, in the case of Electron presets, modulating these parameters in parallel generates a swirling kinetic energy in the audio domain that will make any electron particle detector go haywire!

20 full morphing custom Synthmorph sequences (some of which you can hear in the video) are available in both in .MID and .WAV formats.

The same 20 sequences are now also available as so-called “CTRL ONLY” version, where only the parameter modulations are run while you play the keyboard live on the original (or any other!) patch. This reveals an amazing world of possibilities where you can actually achieve many more preset variations, while also having the joy of exploring and creating your own unique presets.

Layering presets adds a new sonic dimension. For the quick start you get 15 matching preset combinations, playing simple one-finger melodies or trigger notes, which usually means playing 3 different MIDI parts for 3 separate Repr01 instances. You access these 15 example sequences in their original MIDI and WAV formats: modify the sounds that make up the layering, and use them to create additional variations of your own.

If you want to feel the movement, the energy, the pulsating plasma energy of the audio, the dynamics of the emotive sounds, then check out Repr01 Electron!

Content Details:

- 132 U-he Repro1 Electron presets
- presets are available in two formats: .h2p and .nksf (Native Instrument NKS)
- all presets are commented, categorized and tagged
- 20 full morphing custom Synthmorph sequences both in .MID and .WAV
- 20 "CTRL ONLY" .MID sequences for unlimited instant gratification!
- 15 3-tracks layered sequences in .MID and .WAV as sound variation examples
- video tutorial + PDF manual on installation and usage tips

Categories:

- 13 Arp
- 7 Atmo
- 13 Bass
- 12 Key
- 26 Lead
- 37 Seq
- 24 Sfx

Requirements:

u-he Repro1 Rev 9669 or later

ABOUT SYNTHMORPH

Synthmorph sound designer Blaise started composing 20 years ago using an Amiga 500 computer. Later he got into the magic world of synthesizers by getting his first synthesizer, a Korg 05R/W module. Discovering the heart and soul of an electronic instrument was always an implicit process for him and this long experience helps him to make custom synthesizer sounds very fluently, that he also finds one of the most amusing jobs in life.

He has been making factory sounds for Steinberg, Waldorf, Vengeance and Softube synthesizers, and you can expect several more Synthmorph sets from him in the future.

Synthmorph sound sets for synthesizers are the symbiosis of unique MIDI sequences and related synth presets with matching parameter sets constituting a morphing, expressive sound together. Each sequence + synth preset blend is full of momentum, as dozens of parameters are being animated real-time in certain combinations to get a unique still musical result. This Synthmorph concept may lead you to organic, inspiring and previously unheard morphing sonic territories you can use, control and experiment with, using just standard MIDI based hardware or software instruments.

ABOUT RESONANCE SOUND

The new label RESONANCE SOUND is managed by the award-winning sound design companies SOUNDS OF REVOLUTION (SOR) and CFA-SOUND.

Oliver Schmitt (SOR) and Martin Breuhahn (CFA) came together to combine their knowledge for creating the most up-to-date sample packs, soundsets and virtual instruments. Besides that starting from now also their own labels will be distributed by RESONANCE SOUND.

Already for years it's been their passion to explore all kinds of electronic dance music. If you feel just the same and need sonic quality without any compromises - this is the place to keep on your radar!
